SECTION 1: Aircraft Design Definition

Refer to Type Certificate Data Sheet S 39-05 available on the Swiss FOCA website at:

<http://www.bazl.admin.ch/fachleute/lufttechnik/entwicklung/00507/index.html?lang=en>

SECTION 2: Airworthiness Directives

Applicable Airworthiness Directives for this aircraft type can be located on the Swiss FOCA website at:

<http://www.bazl.admin.ch/fachleute/lufttechnik/entwicklung/00656/index.html?lang=en>

SECTION 3: Occurrence Reporting

The Specific Airworthiness Specification may be used as a basis for the issue of a Restricted Certificate of Airworthiness in accordance with 21A.173(b)(2) under the following conditions:

- a) The holder of a Restricted Certificate of Airworthiness based on this Specific Airworthiness Specification shall report to the State of Registry all information related to occurrences associated with the operation of the aircraft which affects or could affect the safety of operation¹.
- b) Such reports shall be despatched within 72 hours of the time when the occurrence was identified unless exceptional circumstances prevent this.
- c) The State of Registry shall forward the information received under (a) to the Agency when it relates to failures, malfunctions, defects or other occurrences which cause or might cause adverse effects on the continuing airworthiness of the aircraft.

SECTION 4: Other Limitations

[This is reserved for EASA use. Additional limitations may be necessary, as found necessary to reduce the risks associated with deficiencies in the reporting chain in Section 3. These may be based on the expectation that specific maintenance may be required due to aircraft ageing, etc.]

¹ AMC 20-8 contains guidance describing the occurrences which are to be reported. This document can be found on the EASA website under Regulations>Certification Specifications:
